

HL65

Illuminated LED sign for escape routes, wall mounted, for outdoor areas

The **HL65** from LightPartner is a robust, wall-mounted LED emergency sign designed for escape route marking in outdoor and marine environments. Encased in durable white polycarbonate with pre-fitted mounting holes, it meets maritime classification requirements and offers **IP65 protection** against dust and water. Powered via a terminal connection and equipped with standard pictogram foils, this low-energy fixture ensures clear, reliable visibility (max ~2.5 W, 230 V AC). Lightweight and easy to install, the HL65 can also be configured with emergency backup or ceiling mounting options to suit various installation needs.

Technical Details

Possible combinations of features and other options available on request. Please contact us for more information.
