

DL90 A

Adjustable downlight, recessed mounting,
indoor use

The **DL90A** is a compact, recessed spotlight that brings focused illumination to cabins, corridors, or public areas aboard ships. Its sturdy aluminum housing and elegant decorative ring—in finishes such as white, chrome, brushed steel, gold, or black—blend seamlessly into interiors. The adjustable light head accommodates GU5.3 or GU10 lamps (max. 35 W), allowing tailored light direction. Designed for ceiling thicknesses up to 20 mm, with spring-clip mounting and a 12 V system requiring a transformer or driver, it ensures precise, customizable illumination that aligns with maritime classification standards, while remaining lightweight.

Technical Details

Possible combinations of features and other options available on request. Please contact us for more information.
