Montreal 5

Decorative Lighting series for living rooms, floor lamp

The **Montreal5** from LightPartner is a decorative floor-standing LED lamp crafted to enrich cabins, lounges, and passenger areas onboard vessels. Its timeless design features a slender, powder-coated steel stem and weighted base—available in matte nickel or polished brass—topped with a classic fabric-style chintz lampshade that emits a warm, diffused light. Designed to international maritime classification standards, the Montreal5 blends interior elegance with naval reliability. Powered via standard AC or DC systems with an E27 LED lamp, it accommodates flexible lighting preferences (lamp not included) and incorporates a clean single-cable connection with a standard plug. Lightweight yet robust, it provides stylish accent lighting with maritime-grade quality.
